

INTERNATIONAL COURSE ATTENTION TO SPILLS

Organized by

Accredited by

Supported by

IMO Level I: Oil Pollution Preparedness Response and co-operation

This course gives the participants the necessary knowledge to respond to oil spills. It is designed for teams for immediate intervention, with the goal of learning efficient clean-up and response techniques. In addition, the IMO Level I provides each participant with the knowledge to select the appropriate equipment according to each contingency.

INCLUDING:

- Support materials
- Transportation to practices
- Lunches and Coffee Breaks
- Certificate issued by Lamor Corporation AB, accredited by the British Nautical Institute

CONTENTS

PHASE 1: *Introduction to oil spills*

- Oil spill properties, behavior and fate.
- Health and safety
- Environmental sensitivity and impacts

PHASE 2: *Response and control strategies*

- Storage and transportation of recovered oil
- Use of dispersants
- Use of absorbing materials
- Losses to wildlife
- Coast Cleaning
- Cleaning, maintenance and storage of equipment
- Oil sampling, cost recovery and documentation
- Spills on rivers and reservoirs (inland waters)
- Boat safety and familiarization
- Burning in situ and incidents.

PHASE 3: *Spill containment barriers*

- Deployment, recovery and configuration of containment barriers
- Failures of containment barriers
- Selection of containment barriers
- Deployment and operation of the different types of skimmers

"Good practices are not an option, but the only alternative"

INSTRUCTOR PROFILE

DARIO MIRANDA
Marine Biologist, Specialist in
Environmental Engineering

With 37 years of experience in the oil industry. Dario Miranda has positioned himself as one of the most renowned and recognized professionals in the field of environmental remediation. Moreover, he has studied several educational processes that allow him to be at the forefront of all the advances in the industry, and standing out as one of the best Marine Biologists specialized in Environmental Engineering.
